

SolToBoogie.MapArrayHelper.
InferExprTypeFromTypeString

```
graph LR; A[SolToBoogie.MapArrayHelper.  
InferExprTypeFromTypeString] --> B[SolToBoogie.MapArrayHelper.  
IsArrayTypeString]; A --> C[SolToBoogie.MapArrayHelper.  
IsMappingTypeString];
```

The diagram illustrates a call to the `InferExprTypeFromTypeString` method of the `SolToBoogie.MapArrayHelper` class. This method is shown in a grey box on the left. Two blue arrows originate from its right side, pointing to two separate white boxes on the right. The top box represents the `IsArrayTypeString` method, and the bottom box represents the `IsMappingTypeString` method, both within the `SolToBoogie.MapArrayHelper` class.
